Profile

Originally from Poland, I've resided in Scotland since 2015 and have achieved fluency in English. As an organized and patient individual, I prioritize cleanliness and maintain a strong work ethic, always completing tasks with dedication and pushing myself to excel. Experienced in both group and individual settings, I adapt easily to new challenges.

My educational journey includes graduating from a music school in Poland with a grade 4 at age 12 and completing five years of high school in Scotland, achieving three Highers and six NAT 5s. In 2022, I earned an HND qualification in Computing Science. Since 2018, I've gained valuable experience and skills through almost four years of employment, progressing from an entry-level position to a high-ranking role.

Currently in my final year of university at the University of the West of Scotland, studying computing science, I am dedicated to continuous learning. Undertaking short courses in computing, I aim to acquire additional qualifications and certificates. Looking forward, my ambition is to contribute to the field of computing, particularly in software development or analysis.

Software Development Virtual Experience

Dec 2023

I took a part in Springpod's Software Development Virtual Work Experience programme. During the programme I gained: -A sound understanding of the inner workings and concepts related to Software Development, and the ability to identify the skills needed to pursue a career in this sector.-The ability to successfully apply knowledge of the Software Development sector by completing quizzes, interactive exercises and activities.-Meaningful interaction with industry professionals through live webinars. -A better understanding of the career pathways within Software Development . -Knowledge of key employability and transferable skills, as well as a sound awareness of employer expectations.

Google Data Analytics Professional Certificate

Present

I am currently working towards obtaining a Data Analyst Professional Certificate by google. The Google Data Analytics Professional Certificate is a comprehensive program developed by Google to provide learners with essential skills in data analytics. Through a series of interactive and hands-on courses, participants gain proficiency in collecting, analyzing, and interpreting data to make informed business decisions. The curriculum covers key topics such as data cleaning, visualization, statistical analysis, and the use of popular tools like Google Sheets, SQL, and Tableau. The program is suitable for beginners and those looking to enhance their data analytics skills for various professional applications. Upon successful completion, learners receive a Google-recognized certificate, validating their proficiency in the foundational principles of data analytics.
